

## Table of Contents (tentative)

### Part I: Theory

- Chapter 1. Causes and Causation
- Chapter 2. Causal Variables
- Chapter 3. Computing Effects
- Chapter 4. Causal Parameters
- Chapter 5. Effect Modification
- Chapter 6. Confounding Bias
- Chapter 7. Selection and Information Bias
- Chapter 8. Frequentist Statistics in Causal Inquiry

### Part II: Practice (and more theory)

- Chapter 9. Estimating the Mean Difference
- Chapter 10. Estimating the Modified Mean Difference
- Chapter 11. Estimating the Geometric Mean Ratio
- Chapter 12. Estimating the Odds Ratio
- Chapter 13. Estimating the Modified Odds Ratio
- Chapter 14. Estimating the Odds Ratio from Case-Control Studies  
Unmatched Design
- Chapter 15. Estimating the Odds Ratio from Case-Control Studies  
Individually Matched Design
- Chapter 16. Estimating the Proportion Ratio
- Chapter 17. Estimating the Rate Ratio
- Chapter 18. Estimating the Hazard (Rate) Ratio  
Cox Regression

Chapter 19. Estimating the Effect of a Continuous Exposure  
Spline Regression

Chapter 20. Standardization and Inverse probability of treatment weighting

Chapter 21. Bits and Pieces

Chapter 22. Afterthought
