

Auditory Cognitive Neuroscience Society (ACNS) 2011 Schedule

Thursday Morning (January 6)

8:30-9:45 Poster Session

9:45-10:15 Conference Welcome (*Andrew Lotto*)

10:15-10:45 Presentations

Brad Story: A brief history of artificial speech in communications research

10:45-11:00 Break

11:00-12:00 Presentations

Suzanne Curtin: Cross-Linguistic Segmentation Strategies: Evidence from English and French

Stephen Wilson:

12:00-1:15 LUNCH

Thursday Afternoon (January 6)

1:15-2:45 Mini Session: Electric-Acoustic Hearing

Michael Dorman:

Chris Brown: Speech is Special-ly enhanced by low-frequency information for CI Patients: A tribute to J.D. Trout, who has a mean F0 of about 75 Hz

Philip Loizou: Contribution of acoustic landmarks and glimpsing to speech recognition in electric-acoustic hearing

2:45-3:00 BREAK

3:00-5:00 Presentations & Discussion

Julie Liss: The Baffling and Bewildering Under-utilization of Speech Perception Theory in the Clinical Practice of Intelligibility Deficit Remediation

Alex Francis: How does spatial separation of sound sources interact with cognitive capacity limitations on speech perception?

Andrew Lotto: Confessions of a neuroscience luddite

Friday Morning (January 7)

8:30-9:30 Poster Session

9:30-11:00 Presentations

Leah Fabiano-Smith: Phonetic and phonological accent change in bilinguals

Rebecca Gomez, Kalim Gonzalez, & LouAnn Gerken: Statistical learning with noisy input

Natasha Warner:

11:00-11:15 BREAK

11:15-12:15 Presentations

Bob Lutfi: Target enhancement and noise cancellation in sound source identification

Chris Braun:

12:15-1:30 LUNCH

Friday Afternoon (January 7)

1:30-2:30 Presentations

Bill Yost: Sound source localization: You would think we would know more by now

Bob McMurray: Lotto, Goldinger and Dorman are only mostly wrong: Computing Cues Relative to Expectations and the problem of variability in speech perception

2:30-2:45 BREAK

2:45-5:00 Presentations & Discussion

Huanping Dai:

Tom Bever:
